

too incredible

it's too incredible  
but it exists

existed long before  
our kind

I like to imagine  
the first peoples  
to see this  
and those who  
decided  
to stay

and explore

generations  
and generations

moving down  
from the rim

and living  
surrounded  
by all the life  
down in these

layers of time
